# Connecting to Cloudflare WARP instructions

The following instruction is designed to guide the user through the process of connecting to Cloudflare Zero Trust network in order to access certain Company's resources internally. Please disregard these instructions if you are not connected to the Company's network as you need to use another application.

a. Download and install the latest version of WARP through Cloudflare.
   https://developers.cloudflare.com/cloudflare-one/connections/connect-devices/warp/download-warp/

b. Open the Cloudflare WARP application. Click the gear icon in the bottom right and choose "Preferences."
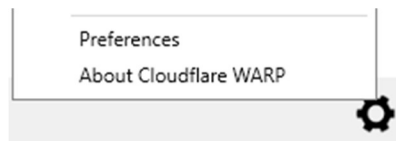

c. Select the "Account" tab from the menu.

d. Select "Login with Cloudflare Zero Trust."

e.   When prompted, enter corgistudios.cloudflareaccess.com as the team name.

Enter your team name:

corgistudios .cloudflareaccess.com

Cancel   OK

f.   A page will open on your browser. Follow instructions through Cloudflare Access to connect your Azure AD (Microsoft) account with Cloudflare WARP. Please note that only emails ending in @corgistudios.tech are permitted to connect.

g.   Choose "Open Cloudflare WARP" through the banner pop-up.

Open Cloudflare WARP?

https://corgistudios.cloudflareaccess.com wants to open this application.

☐   Always allow corgistudios.cloudflareaccess.com to open links of this type in the associated app

Open Cloudflare WARP   Cancel

h.   Connect to the Zero Trust. You are able to access Company's resources through the Portal, https://portal.corgistudios.tech/.

Zero Trust

Connected
Your Internet is protected.

Troubleshooting:

If you have problems with permission, make sure Cloudflare WARP Gateway is set to VPN.CORGISTUDIOS.TECH.

Please reach out to support@corgistudios.tech for help or questions.
